FOREWORD

The population figures shown in this report are based on Manitoba Health Services Commission records as of June 1, 1977 to 1979, and December 1, 1981 and 1982. The data are presented according to regional boundaries for the Department of Health (see map on preceding page). It may be noted that the drop in total population between 1979 and 1981 is due to an audit of the records initiated in January, 1980. For the same reason, population estimates are not available for June 1, 1980 and 1981.

Data for the regions include populations of Cities, Towns, Villages, Rural Municipalities, Local Government Districts and Unorganized Territories. It should be noted that villages and towns are separately identified only if they are incorporated. If unincorporated, their population counts are included in the Rural Municipality in which they are located. Also included in the regional data for 1976-1979 are population figures for out-of-province Indians and Inuit living on crown land in Unorganized Territories. As of 1981, they are included in the Indian Band counts for Thompson Region.

Data for Indian Bands are included separately at the end of the report. The data are grouped by Health Region. The counts represent registered Indians living on-reserve, off-reserve and on crown land.

ABBREVIATIONS AND DEFINITIONS OF TERMS

C: City

T: Town

V: Village

LGD: Local Government District - a designated area having no local government; administered by the province through a resident administrator.

U.T.: Unorganized Territory - areas of the province with no local government or resident administrator.

INTRODUCTION

When using the population figures given in this report, the following should be noted:

1a. In constructing Regional population figures for June 1, 1977-1979, it was necessary to disaggregate several L.G.D.'s and U.T.'s. The areas which were split are the L.G.D.'s of Alonsa and Park and the U.T.'s.

The disaggregation was as follows:

L.G.D. of Alonsa was split between the Parkland and Central Regions and L.G.D. of Park between Parkland and Westman. U.T.'s were split between Eastman, Interlake, Norman, Parkland and Thompson Regions.

It was estimated that the population of the above areas were as follows:

Alonsa L.G.D.	Parkland	50.0%
	Central	50.0%
Park L.G.D.	Parkland	50%
	Westman	50%
Unorganized	Eastman	20.0%
	Interlake	8.0%
	Norman	15.0%
	Parkland	28.0%
	Thompson	29.0%

1b. The population figures for December 1, 1981 and 1982 for the aforesaid L.G.D.'s and U.T.'s were no longer split based on percentage distribution. Population were allocated according to Postal Codes, yielding thus more accurate figures.

2. Populations for small areas, say a rural town, can be biased because the mailing address may be reported as the place of residence. An individual residing outside of the town but having his mailing address in the town may, therefore, be counted as living within the town. This bias in the population figures would be reduced as the catchment area is increased. Thus, regional estimates would not be significantly affected by the misclassification bias.

Any questions regarding this report should be directed to the Statistics Branch, Department of Health, 2nd Floor, 210 Osborne Street North, Winnipeg, Manitoba, (944-3258).
